

# Applied AI Mastery Program

## Introduction

Rina Buoy, PhD

# Instructor

## ➤ Teaching experiences

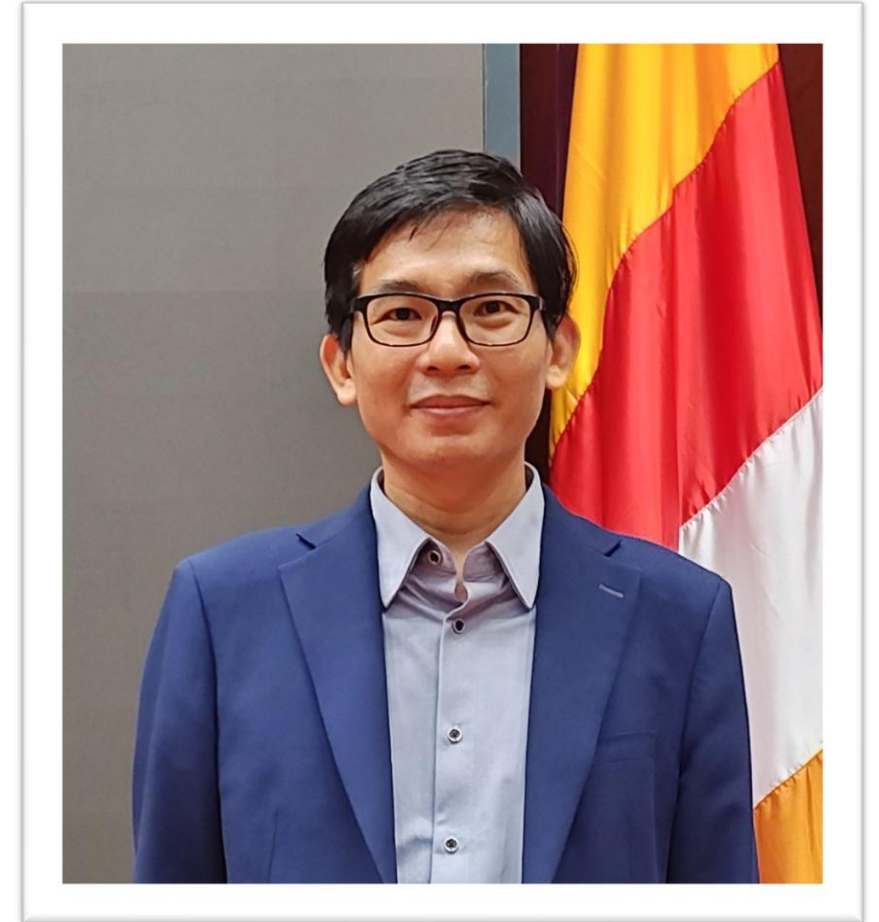

- ML/AI/DL-related courses for Master's programs at AUPP, UP, & RUPP
- AI/DS certification programs at AUPP

## ➤ Working experiences

- 2020-now: Senior AI Researcher at Techo Startup Center (TSC)
- 2012-2020: R&D Lead at Three60 Energy (Malaysia)

## ➤ Education

- PhD in intelligent information (AI), Osaka Metropolitan University (OMU)
- Masters in Geoscience from Universiti Teknologi PETRONAS and in IT Engineering from RUPP
- Bachelor of Petroleum Engineering from Universiti Teknologi PETRONAS

# About the program

## Foundations

- Stats, Probability, algebra, calculus, and ML/AI fundamentals, neural networks, and deep learning (RNN, CNN, & Transformers)

## Core AI Engineering

- Modern AI - LLMs, prompting, retrieval-augmented generation (RAG), Tooling calling (MCP), AI agents, and agentic AI.

## Production & Capstone

- Bring AI/ML/LLM-powered ideas into production and end-to-end projects

### Applied AI Engineer Three-Month Mastery

#### Led by Dr. Rina BUOY

Instruction is provided by an expert with a PhD in AI from Osaka Metropolitan University.

#### Personalized 5-10 Student Cohorts

Small class sizes are strictly maintained to ensure high-touch personalized attention and strong peer accountability.

#### Month 1: Foundations & Literacy

Focuses on Python for AI, data handling (NumPy/Pandas), classical ML fundamentals (Scikit-learn), and deep learning intuition.

#### Month 2: Core AI Engineering

Deep dive into the modern stack: Prompt Engineering, RAG pipelines, AI Agents/tool use, and the critical skill of building evaluation suites.

#### Month 3: Production & Capstone

Moving from notebooks to the real world with FastAPI, Docker, LLMops (observability/safety), and a final end-to-end capstone project.

### Career-Ready Deliverables

#### Portfolio Piece 1: ML Project

A complete machine learning classifier built on a public dataset to prove reasoning about model quality.

#### Portfolio Piece 2: RAG/Agent App

A functional "Chat with your Documents" application or autonomous agent featuring a custom evaluation suite.

#### Portfolio Piece 3: Production Service

A production-grade AI service wrapped in an API and containerized for cloud deployment.

#### Portfolio Piece 4: The Capstone

A substantial, documented project solving a real-world domain problem, complete with a public repo and demo video.

#### 3-Month Intensive Format

A 12-week commitment requiring 10-15 hours per week, designed for learners who can code or are ready to ramp up quickly.

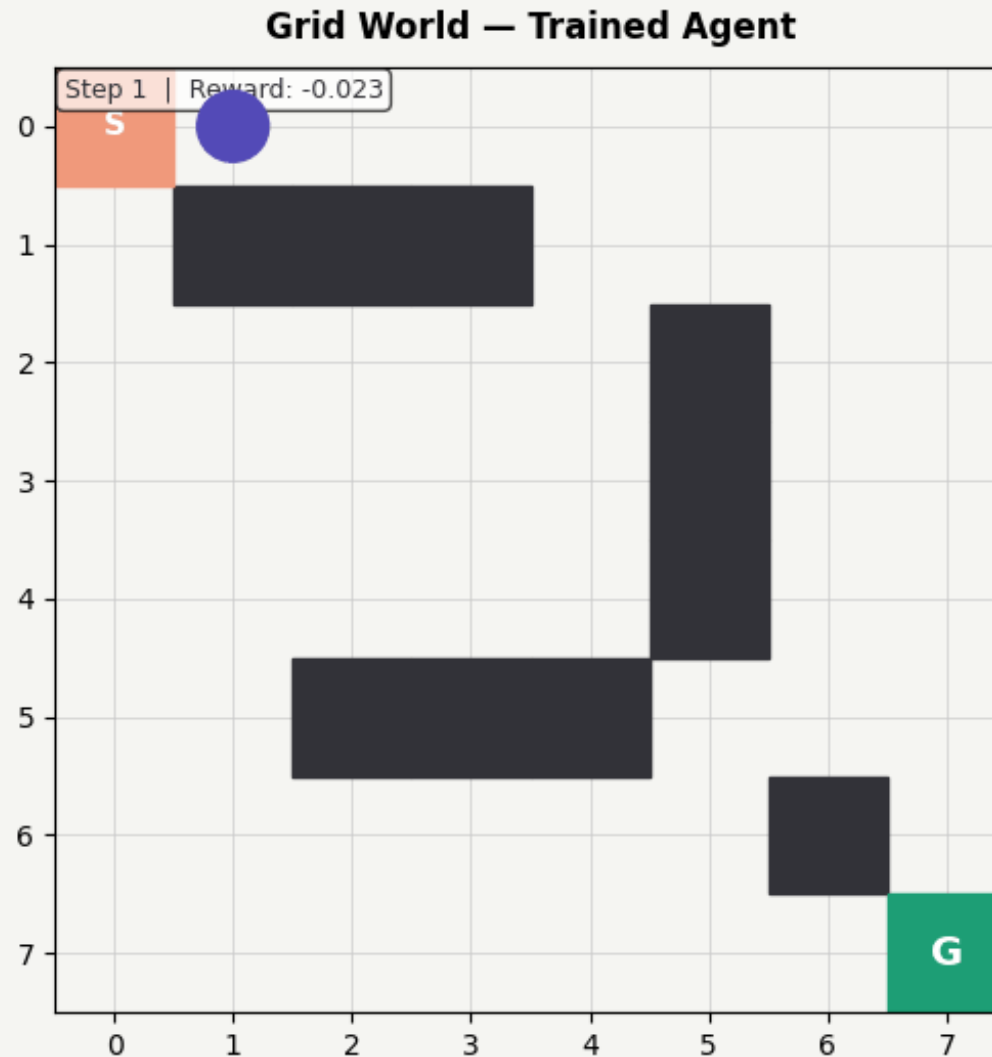

#### Get in Touch

Inquiries and applications can be directed to [rinabuoy@gmail.com](mailto:rinabuoy@gmail.com).

# What you will get

- Solid foundations to excel yourself in this field (industry or academia)
- AI/ML/DL best practices & experiences
- Career starter kits to AI experts, trainers, engineers, or researchers
- **'75% Scholarship'** for our subsequent courses

# Why this program?

Any question/suggestion?
